During a meeting held by research specialists of the Meteorological and Hydrological Service [redacted] papers were read by members of the Main Observatory in Potsdam, the Aerological Observatory in Lindenberg, the Geomagnetic Institute and Observatory in Potsdam-Marienberg, the meteorological observatories in Wahnstedt, Greifswald and Kuehlungsborn, the Radiation Research Institute in Gotha, and the Central Institute for Applied Meteorology. The Central Institute for Radio Technology was greatly interested in the measurements concerning the propagation of ultra short waves currently carried out in the Meteorological Observatory in Kuehlungsborn. Measurements were made on the 2-meter band on specially selected tracts on land and sea.
